

We've got your blind spot covered

PreView® Plus

(All in- one safety system integrates vision with active blind spot detection)

- ▶ **Combines best in class active blind spot detection radar with visual clarification camera and in-cab monitor**
- ▶ **Monitor supports up to four cameras and 24 sensors for complete coverage**
- ▶ **Automatically switches to single screen view where detection occurs (multi-sensor and camera configuration)**

Introducing the latest breakthrough in the PreView family of active collision awareness safety systems, **PreView Plus**. This new system integrates easily with the latest PreView Radar family of sensors providing direct connection from the sensor to the camera to the monitor. The end result is a single-system solution for your active blind spot detection and visual clarification needs. The key features of this system include:

- > A single point of focus for the driver by integrating detection indicators directly on to the monitor.
- > Support for up to 4 cameras/views and 24 sensors for 360° blind spot coverage
- > Monitors menu buttons, simplify the pairing of sensors with a camera
- > A button to silence the audible alert on the monitor panel. This allows the driver to visually clarify that the object is not a threat and silence the alert so it won't become an annoyance.
- > Full screen mode when the vehicle is in reverse, showing only the rear camera view (regardless of any detections on other sensors).

Learn how you can achieve more than 75% reduction in backing accidents like other PreView customers by starting your pilot project today!

Part no. TBA

All-in-one blind spot detection, active warning & visual clarification

Connect directly to latest PreView radar sensor(s)

Colour-coded indicators and audible alert give driver active warning and object proximity information
