5LW Wheel Chock

Lightweight • Durable • Highly Visible

Extensively tested on site under extreme operating conditions.

Lightweight wheel chocks that can really handle the pressure!

Trysome stocks a wide range of tough and impact-resistant Polyurethane wheel chocks in a versatile design that can be used on a wide range of vehicles from light vehicles to the largest haul trucks.

Our unique design has a “toe” at the leading edge of the chock which creates a vertical load eliminating any horizontal forces. This locks the chock in position and prevents the chock from moving or being squeezed out and becoming a deadly missile. The outer skin provides grip onto surfaces so that the chock doesn't need “bolt on” rubber strips.

Features & Benefits

- Light weight
- Manufactured from materials which are non-conductive, impervious to water, chemicals, fungus, salts, rot and termites, resistant to fuel, oil and solvents
- Improved “toe” design to reduce ejection
- Manufactured from slip-resistant, durable polyurethane
- Produced in bright yellow for improved visibility
- Recessed handle for easy portability & storage
- One-piece construction

Model	Product Image	Description	Dimensions	Weight	To Suit Tyre Ø
T26001561100 NPR2155		5LW Wheel Chock	621mm long x 343mm wide x 323mm high	11kg	2200mm to 3500mm
TBA NPR2136		Galvanised steel single chock bracket to suit size 5LW wheel chocks	-	8.5kg	N/A

Your own risk assessment must be carried out before using this product. This information is to be used as a guide only.

Applications:

Caterpillar Dump Truck 797, 793, 789, 777
Komatsu Dump Truck 630, 730, 785
Hitachi Dump Truck EH 3000, EH 3500

Caterpillar Loader 993K
Komatsu Loader WA 700, WA 800, WA 900
